Summary

Regrowth is a puzzle game where you race against time to save islands from sinking.

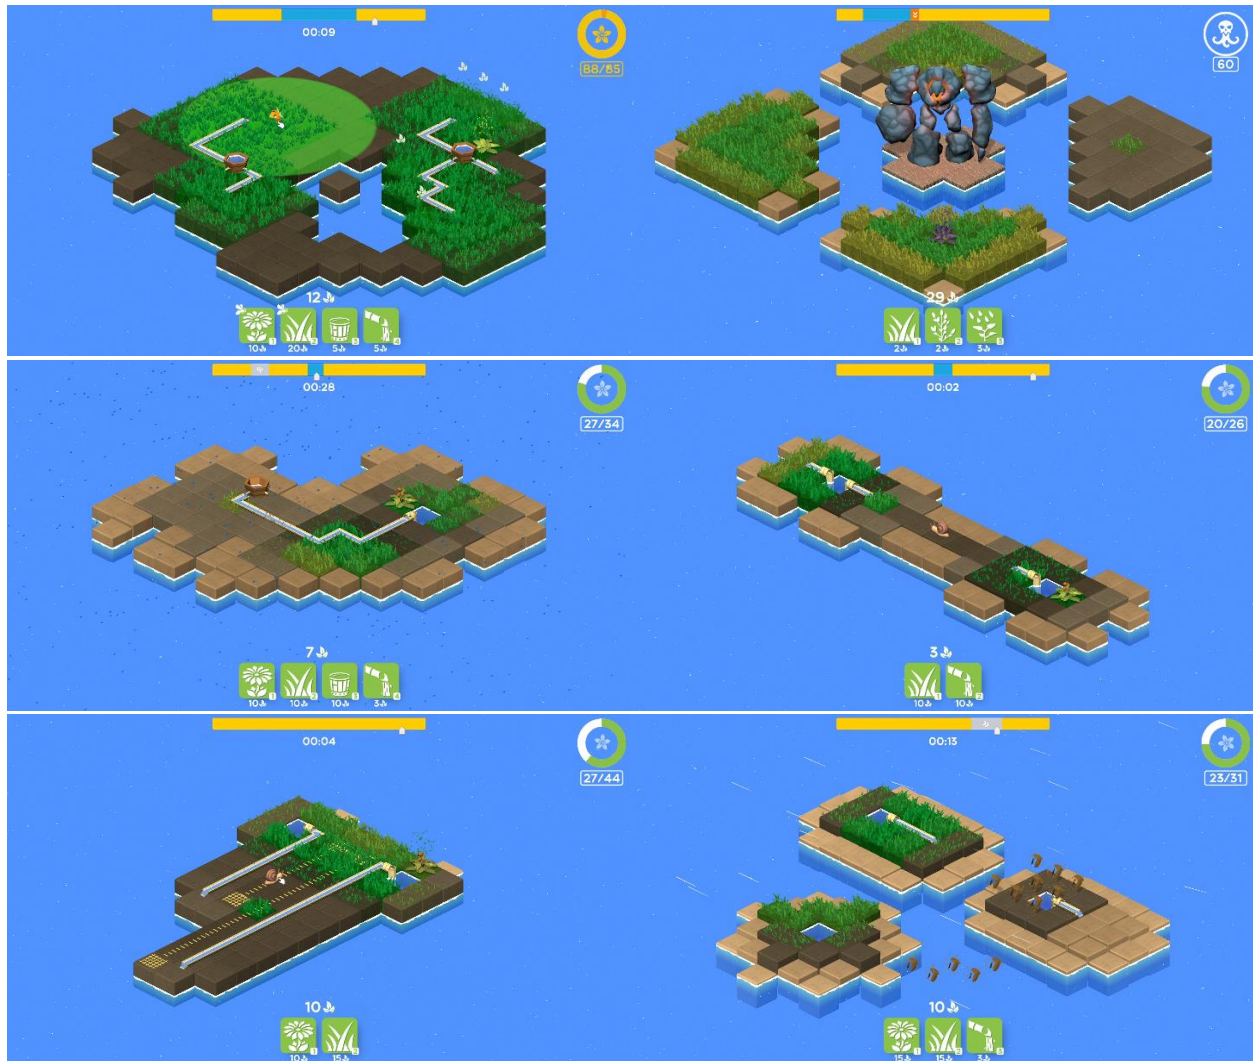

Use plants and animals, collect and channel water... However, only with strategy and optimisation can you solve all the levels.

Will you be able to save the earthen realm?

Key Points

- Watch out for ponds and rain because having water for your plants is crucial in these dry times!
- Use different plants and tools, optimise your positioning and timing. Planting a plant at the wrong place could lose you the island!
- Time your decisions and manage your water supply well because the land dries, the time is limited, and the seasons change!

Background

The development on Regrowth originally started during the [Ludum Dare 46](#) game in April, 2020.

Through numerous testing phases and development videos on YouTube, a community around the game arose.

After a year of development on 19 April 2021, Regrowth is finally released in 22 languages*, thanks to the community.

**English, Italian, German, Hungarian, Korean, Russian, Portuguese – Brazil, Portuguese, Spanish – Spain, Arabic, Simplified Chinese, Spanish - Latin America, French, Dutch, Swedish, Ukrainian, Czech, Danish, Greek, Polish, Traditional Chinese, Turkish*

***Portgate Studios allows for the contents of Regrowth to be published through video broadcasting services for any commercial or non-commercial purposes. Monetization of videos created containing assets from Regrowth is legally & explicitly allowed by Portgate Studios.*
